ENTERTAINMENT.

INDUSTRYSIM

*a new industry-focused Simulation & Construction game
for students, enthusiasts and industry professionals.*

IndustrySim game allows the player to learn about process industry in the following fun and motivating ways...

Design and construct industrial facilities in state of the art 3D-graphics enabling assembly of the whole plant from different available components, that can be chosen by the player.

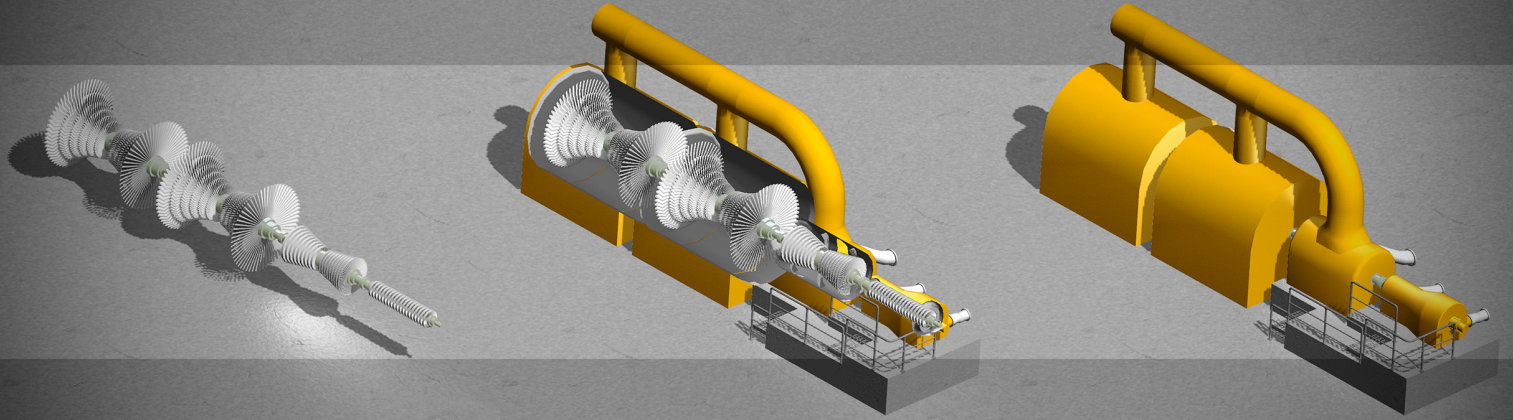

Operate the plants within realistic simulation, and fine tune and optimize the industrial processes.

Utilize the Social Multiplayer environment to compete or co-operate with other players in construction and operation of optimal plants as well as making good investments and solving different types of industry related challenges and events.

IndustrySim gives an opportunity to learn and educate about industry and related concepts, such as power generation, in an engaging, creative and modern way!
